**Subject:** Do not change the zoning of the shorelines of BI

I find it amazing this is even up for conversation. There is not any studies that can conclude having a dock or stairs to the beach is going to hurt the environment. Nor is there any proof that removing them is going to bring back the salmon!

Bainbridge Island will be committing suicide if this passes! We have enough law suits!

Questions:

Who is going to live on the water and pay taxes at the value they are taxed at?

Who is going to pay to remove them? Who will want to live on an island without being able to get on the water?

Who is going to pay the property owners the money you are taking away by substantially lowering the value they are paying to live on the water?

So many questions!!!
